

I-LAG™

BRAND EYE LAG SCREWS

Doc's I-LAG™ brand eye lag screws have been the industry standard since the introduction of our short self-driller, the 750 SD in the late 1990's. Doc's is the only manufacturer in the country to offer an eye lag screw with a current ICC listing & LA City RR Report. Most of our screws are American Recovery Act & RoHS Compliant. We offer a variety of installation tools to install our eye lag screws, including the I-DRILL DRIVER 1/4" hex driver & Lagmaster® pole tool which can extend up to 24'.
